**TO MY BELOVED CHARLIE, MY HUSBAND AND BEST
FRIEND, OUR CHILDREN, AND CHILDREN
EVERYWHERE**

TO THE READER

May I suggest a quick read-through when you first purchase this book to become acquainted with the scope of services available for our children. You will no doubt be as surprised and delighted as I was to discover a wide variety of unique services that you never knew existed.

The book begins with Child Safety. Information is available to assist you in choosing safe toys and playground equipment. You can check on what cancer-causing products you may be purchasing without being aware of the danger. The *Hug A Tree* organization can provide slide programs to teach your child what to do when lost. Also covered are such subjects as drug and alcohol abuse, child abuse, violence in the home, incest, teen pregnancy, and suicide. A Child Health chapter includes most of the major childhood diseases. Even included is *Laughter Therapy* – old Candid Camera program tapes that are available for sick children. *Help for Children* also deals with the needs of the physically and mentally handicapped child. You will find information on the many national hotlines, helplines, clearing-houses, and other support systems available to help children through mine fields set for their potential destruction.

You won't want to miss the last chapter of *Help for Children*. It deals with children's non-crisis needs. Included is information on ways to help your child learn; how to obtain Library of Congress reading lists for pre-school to junior high age children; techniques to help your child achieve in school; music and film rating services; and information to assist your child in choosing a career. Most of the above services are free. You will probably find some agencies that you will want to contact right away! A vast network of help and support organizations await your call or letter.

Best wishes to you, dear reader, and all those children whose lives you touch. MJW

INTRODUCTION

This book evolved through 27 years of working with child-care professionals, parents, and children – people who often needed help for a life crisis, or a not so urgent problem concerning their children, and wanted to know where they could call or write. I found existing information and resources to help children scattered and not readily accessible. The need to compile this most useful information into one easy-to-read volume became apparent. *Help for Children* is not meant to be a comprehensive volume, but rather representative of the areas that I have found most often needed.

I would like to express my appreciation and admiration to all the people behind the Associations, Clearinghouses, Centers, Hotlines, Helplines, and other Support Groups who are caring for the needs of our nation's children. Thank you for the generosity, love, and energy that is involved in keeping these services available.

If there are some important resources that I have missed that you think should have been included in this book, please write me in care of the publisher, ROCKY RIVER PUBLISHERS, 2016 Willowdale Drive, Shepherdstown, WV 25443.

Working together we can help our children sing that unique song that only their special life can sing with its full clarity and beauty!

About the Author

Miriam J. Williams Wilson was born and raised in London, Ontario, Canada. She is a R. N. and Biofeedback Specialist and heads a *Children's Educational Center for Stress Management* in historic Shepherdstown, West Virginia – one and a half hours from Washington, DC. Miriam is a mother of a (his, mine, and ours) family of eight. Her years of childraising and operating a stress center for children have made her acutely aware of the needs of young people.

Miriam Wilson's professional career spans 27 years. She worked first in charge of emergency and later as a head nurse at a Los Angeles hospital. Subsequently, Miriam spent four years as a psychometrist, doing psychiatric testing, for a private psychiatric hospital in Ohio and an additional four years as a biofeedback specialist for a psychiatrist in Virginia.

Mrs. Wilson, in addition to heading a stress center, lectures extensively to children and adults on stress. She recently appeared on a radio talk show in Washington, D.C. and has just completed another book, *Stress Stoppers for Children and Adolescents*.

These people promote adoption opportunities for children throughout the US, especially children with special needs. They operate a telecommunication network that links children waiting for adoption, adoption agencies, and prospective adopters. They also provide a information and referral service and conduct public education programs.

Write: The National Adoption Center, 1218 Chestnut Street, Philadelphia, PA 19107 or **Call:** 800-TO-ADOPT; and in PA (215) 925-0200.

NATIONAL COUNCIL OF ADOPTIVE PARENTS ORGANIZATIONS

This organization can help put you in touch with local help if you can't find it. They are particularly interested in mixed race children and children from overseas. They try to prevent restrictive legislation that will prevent the free flow of children to adoptive homes.

Write: National Council of Adoptive Parents, P. O. Box 543, Teaneck, NJ 07666.

AID TO ADOPTION OF SPECIAL KIDS

An organization that recruits adoptive parents for children with special needs. They publicize the need for adoptive homes for children with handicaps.

Write: ASK America, 1540 Market Street, Suite 70, San Francisco, CA or **Call:** (415) 543-2275.

THE GREATEST RESOURCE - GOD

Call: 24 hour hotline. Instant access. Children can say something like "Hi God" and then talk to him. He is always available.

I asked my theologian friend, Dr. Graham Maxwell, about my describing God as children's greatest resource. He replied:

"Respect for religious freedom makes us properly cautious in talking about God, especially in public schools. But children growing up in this country can hardly avoid becoming aware of some force or being called 'God.' From the humblest nickel to the pledge of allegiance they are reminded that in this nation they live under a god they can trust, and in song they ask him to bless America.

"But they also hear that hurricanes, earthquakes, and other disasters are 'acts of God.' Their history books tell of cruel wars and persecutions carried out in God's name. And if they grow up in homes that read the Bible, they know many stories of fire, flood and destruction that seem to picture God as angry and severe. What frightened child would want to communicate with such a fearsome god?

"It should be little wonder that some children develop confusing or even forbidding conceptions of this god their nickels say we trust. And anything that seems to be the cause of hurtful stress is unavoidably a matter of concern to those for whom this book was written—people who want to help children. But their ability to help is naturally affected by their own conception of God. They could have the same god as the troubled child! Besides, is it trespassing on the children's rights to touch on this subject at all? I believe there is an understanding of God that does not jeopardize the children's freedom but rather guarantees and reinforces it.

“At each inauguration the president solemnly places his hand on the ancient book that led the fathers of this free land to declare their trust in God. From the evidence offered in that same book I developed my personal conception of God. I see him as an infinitely powerful but equally gracious person who values nothing higher than the freedom, dignity and individuality of his intelligent creatures, so that their love, their trust, their willingness to listen and obey may be freely given. He even prefers that we regard ourselves not as his servants but his friends.

“Of a god like this children have no need to be afraid. Moreover, to a god like this it is of supreme importance that children never be deprived of their precious ability to ask questions and make up their own minds!”

In working with children in my Stress Center (with parents permission) I talk to the children in a non-denominational way about God. I have found Einstein's and Margenau's statements about the discovery of God through scientific inquiry very helpful. In the *Human Side* Einstein states, “Everyone who is seriously involved in the pursuit of science becomes convinced *that a spirit is manifest in the laws of the universe, a spirit vastly superior to that of man* and one in the face of which we with our modest powers must feel humble!” Dr. Henry Margenau, Professor Emeritus of Physics at Yale, states, “If you take the top-notch scientists, you find very few atheists among them.” Professor Margenau also stated, “If you take the outstanding physicists, the ones who have done the most to advance modern physics, especially Heisenberg, Schroedinger, Dirac (a Nobel Prize winner), you find them all interested in religion. All these men were intensely interested in religion.”

I tell the children that I've found God fun to be friends with. “You know what I do,” I say to them, “when someone is unfair or hurts my feelings? I tell God on Him!” Infinite resources are available to solve the problem for the other person and myself. More than any parent I've known, God as I now know Him, loves both His good and bad

children unconditionally. But He created us free. To be free, we must have a choice. So God waits with love and longing for our friendship. The children begin to enjoy God as a friend. They feel comfortable using his 24-hour hotline anytime they want. God is someone they can trust, One who welcomes their questions, invites them to consider the evidence, and make up their own minds.

If you would like more information about our greatest resource, one source that has meant much to me in my work with children is *Study Tapes International*. Available are such audio tapes as *Questions Children Ask about God*, *Helping Children Ask Questions about God*, *The Picture of God in the Whole Bible*, and video cassettes such as, *Another Look at God* (filmed in England) and other materials. They are excellent and suitable for all persons whatever their beliefs and questions.

HELP FOR CHILDREN

For
Parents
Teachers
Counselors
Physicians
Psychiatrists
Psychologists
Social Workers

When a problem or emergency arises with our children we often remember vaguely a hotline or organization that could help us. But "What was the number of that hotline?" and "What was the name of that organization?"

HELP FOR CHILDREN puts free and accessible emergency information at your fingertips. It provides quick reference to helpful organizations and information dealing with the major problems faced by our children.

HELP FOR CHILDREN covers a wide range of problems including TEENAGERS IN DISTRESS, SAFETY (in and out of the home), PHYSICAL AND MENTAL DISEASES, HANDICAPPED CHILDREN, MISSING AND EXPLOITED CHILDREN, MATERNAL AND CHILD CARE, AND PARENTING PROBLEMS. A copy of **HELP FOR CHILDREN** should be in every home and on the desk of every child care professional.
